# Getting started and help

Four steps to your first login, and where to get help.

1. **Open the link**
   Use the link shared by LIB: **app.libeducation.com**.

2. **Sign in**
   Enter the username and password LIB gave you.

3. **Set a new password**
   Change it after your first login so only you know it.

4. **Add it to your home screen**
   **Android:** tap Install. **iPhone:** tap Share, then Add to Home Screen.

**FORGOT YOUR PASSWORD?**

Call or WhatsApp LIB on +91 98453 93178 and we will reset it.

## Getting help

### Inside the app

- **Help** button: answers how-to questions
- **Support** button: report an issue
- **Chat**: message teachers, students and parents

### Contact LIB

- WhatsApp / phone: +91 98453 93178
- Email: kakali@kakali.in
- Website: www.libeducation.com

You only see your own information. Issues you raise show a status (Open, In Progress or Resolved) and LIB can reply with a note.

# The admin menu

The menu on the left (☰ menu at the top on a phone) is in groups.

| Group | Pages |
|---|---|
| **Dashboard** | Stats, classes expiring, demo funnel, AI students at risk |
| **Daily work** | Class Log, New registrations, Communication, Demo Bookings, Support, Rebuild Pending Classes |
| **Money** | Fees, Payroll, Expenses, Reports & Export |
| **People** | Students & Subscriptions, Attendance XP & Levels, Student Onboarding & Communication, Teachers & Subjects, Parents |
| **Teacher Monitoring** | Star Teacher, Research Monitoring, App Usage, AI Usage, Study Plans, Homework, Question Bank Monitoring, Teacher Appraisal |
| **Learning** | Knowledge Arena |
| **Analytics** | Demo Analysis, Class Delivery Intelligence, Student Engagement Intelligence, Revenue Intelligence, Teacher Performance Intelligence |
| **System** | Settings, Manage Admins, AI, Audit Log |
| **Superadmin** | Superuser admins only: Academic Year, backups, danger zone |

**QUICK HELP EVERYWHERE**

Tap **?** next to a heading for help on that card. The **? Help** button at the top has the Quick Guide and the Help bot.

**LINKS YOU CAN SHARE**

Each page has its own address, for example **.../#fees** or **.../#setup**, so a bookmark opens that page.

# Admin Dashboard

Start here for a quick view of the centre's current position and items needing attention.

**At-a-glance stats**

Use the dashboard statistics as a summary; open the relevant source page to verify or act on an individual record.

**Classes expiring and demo funnel**

Review the classes-expiring indicators and the demo funnel, then follow up from the Students or Demo Bookings pages.

**AI STUDENTS AT RISK**

The AI student-risk summary is a prompt for review, not a substitute for the student's actual attendance, learning and subscription records. Open the relevant student record before deciding what action to take.

# Your month at a glance

The jobs that come round every month.

| When | Job | Where |
|---|---|---|
| **Every day** | Log classes, answer chats and support, follow up demos and new registrations | Class Log, New registrations, Communication, Support, Demo Bookings |
| **1st to 7th** | Raise the month's fee requests and send fee messages | Fees › Raise fee requests |
| **As payments come** | Confirm Razorpay payments, mark requests paid | Fees |
| **Any time** | Send a Short reminder to families still due | Fees › Pending fee requests › Message |
| **Month end** | Check payroll, mark teachers paid, print salary slips | Payroll |
| **Month end** | Add expenses, check net profit | Expenses, Reports |
| **When timetables change** | Update Class Frequency, rebuild the schedule | Teachers & Subjects, Rebuild |

# Class Log

Record a class on a teacher's behalf.

1. **Pick the date and teacher**
   Search by name, ID or mobile, then tap the teacher.

2. **Fill in the class**
   Student, subject, Group / Individual, Online / Offline, Present or Absent, number of classes and remarks.

3. **Log class**
   The student's classes left show before you save, with a warning if they have none.

> **ABSENT USES A CLASS**
> Absent counts like Present: it uses one of the student's classes.

## The register

- Below the form: the teacher's classes for the **Selected day** or the **Whole month**, with a month total.
- Dates show the weekday, for example **Tue, 27 Oct 2026**.

# New registrations

Families register online; you decide who becomes a student.

1. **Share the link**
   **app.libeducation.com/register.html** (also on the login screen). On the page: 📋 Copy link, or type a mobile and 📤 Send link on WhatsApp.

2. **Check the form**
   New forms show here, with a count on the menu and Dashboard. ⚑ flags: mobile already a family, had a demo, several forms. 📞 Call or 💬 WhatsApp to confirm.

3. **Accept**
   Correct name, grade, board, mode, type and academic year, then **Add student**. Same mobile as a family: add as brother/sister.

4. **Send the logins**
   Accept makes the parent login (mobile) and student login (student code). Send both with the 📤 buttons.

- Subjects are not enrolled for you: open the student and enrol them with a teacher. The form's subjects, school and message show on the student's page; **View original form** shows it all as sent.
- **Reject** (Reopen undoes it) or tick forms and **Archive**. Nothing is deleted: **Show archived** brings them back.

> **JUNK IS BLOCKED**
> Bots are stopped, at most 3 forms per mobile and 30 a day in total, and nothing becomes a student until you Accept.

# Demo Bookings

Demo bookings from the website, from first call to admission.

| | |
|---|---|
| New | Just booked: call the family, then Confirm a teacher and time |
| Scheduled | Mark done after the demo, Mark lost, Reschedule or Cancel |
| Done | Demo given: Convert to Student, or Mark lost |
| Converted | Student record made; the teacher gets a ₹100 bonus |
| Lost | Did not join (with an optional reason); Reopen brings it back |

- **Paid / Not paid:** a Razorpay payment for a demo marks the booking Paid by itself. One the app could not match shows at the top: pick the booking, or **Not a demo**.
- **Convert to Student** fills a new student record from the booking; → **Open student record** takes you there.

## Demo Register

- Every demo a teacher gave. Teachers mark their own demos Done from their Dashboard.
- You can set any status, add a Lost reason, or go straight from Pending to Converted with **Link & Convert**.
- **Demo results** shows each teacher's demos, Converted % and why demos were lost.

# Communication and Support

Talk to everyone, and fix what they report.

### Chat

- **New message**: one-to-one with a teacher, student or parent
- **New group**: several people at once
- Unread counts on the menu and the 💬 button

### Announcements

- A notice above the menu bar
- For everyone, a whole role or one person
- Stays until dismissed, expired or deleted

### Support Inbox

- Problems reported with the Support button by teachers, students and parents.
- Filter by Open, In Progress, Resolved or All. Reply and change the status; the person sees both.

# Rebuild Pending Classes

A fresh schedule of upcoming classes from Class Frequency.

1. **Choose the scope**
   All active students, or one student.

2. **Preview Rebuild**
   Shows per student and subject: classes left, future Pending classes to remove, overdue classes kept, weekly frequency.

3. **Rebuild**
   Removes only future Pending classes and makes new ones. Subscription limits and teacher clashes are still checked.

**WHAT STAYS**

- Done classes, overdue Pending classes and other statuses are never touched.
- Students with no Class Frequency are skipped and listed.

## New subscriptions and renewals

- The top section on this page adds paid classes that are not yet on the schedule for new students and renewals, after the last scheduled class.
- It uses Class Frequency and saved timings. It only adds missing paid classes; it does not delete or rebuild existing classes.
- The process runs automatically every night at 1 AM. Use Preview, check the proposed additions and Needs setup list, then Confirm to run it manually.
- A student page can also show paid classes not yet scheduled, with an Add action. Students without Class Frequency or a teacher need setup first.

### Placeholder times

- New classes get **00:00** (Group) or **01:00 / 02:00** (Individual).
- Teachers see them under **Class timings to correct** in Pending Action Items and put in the real time.

# Fees page

Prices, renewals and every payment in one place.

| Card | What it does |
|---|---|
| **Students needing renewal** | Zero or negative balances, and enrolled students who never paid |
| **Razorpay payments to confirm** | Fee payments from the Razorpay page, each with a suggested family |
| **Pending fee requests** | Every unpaid request, grouped by family |
| **Raise fee requests** | The month's requests for every student in one go |
| **Fee Message Settings** | UPI ID, QR code and contact number used in fee messages |
| **All subscription payments** | Every payment for a student or everyone, by month |
| **Fee setup** | Per-class rates by category, Group / Individual and Online / Offline |
| **Discount structure** | Discount tiers by number of classes |
| **Fee calculator** | Works out a fee and can push it as a fee request |

**RATES**

A student's **Special fee rate** (on their page) replaces Fee setup wherever their fee is worked out. A missing rate means a request can't be raised.

# Raise fee requests

One run at the start of each month.

1. **Pick the Target Month**
   Then tap **Preview Fee Requests**. Preview works any day and saves nothing.

2. **Check the preview**
   Grouped by family, each row with classes, amount and its working. Change classes or amount, or untick a row.

3. **Look at Not raised**
   Who was left out and why: a request already pending, enough classes left, no rate, archived.

4. **Confirm**
   Only on the **1st to 7th** of the month, once a month. **Reset** removes the run so you can do it again.

## How the classes are worked out

- **Class Frequency:** each saved weekday counted in the month, minus clearly cancelled teacher-leave classes.
- **Classes left:** paid minus used (Absent counts as used). Owed classes are shown separately.
- **Packages:** a last payment of 30, 50, 60 or 100 classes asks for the same package again.
- **Amount:** rate × classes, less the bulk discount: the best tier reached by the request, the child's subjects added up, or the whole family added up. Tick **No discount** on a row or family for this run only.

**KEEP A COPY**

**Download Excel** saves the whole run.

# Fee messages and getting paid

One message per family; confirm each payment.

## Send the message

1. **Tap Message**
   On any pending request. It makes one message for the whole family.

2. **Check the text**
   Each child's subjects, classes and amount, the total, how it was worked out, UPI and Razorpay details and the parent login.

3. **Send it**
   On a phone the WhatsApp button opens the app. On a computer: 📤 **Desktop** (WhatsApp app) or 📤 **Web**.

- Tick **Short reminder** for a follow-up: only the opening line changes to "gentle reminder … still due".
- Sending records the date, so you can see when the family was last reminded and how many times.
- Brothers and sisters are one family when they share a parent login or mobile. Tick **Bill separately** on a student to keep them out.

## Mark it paid

- **Mark paid** for one request, **Mark all paid** for the whole family with one date and reference. Type the **Amount received**.
- **Part payment** (less than due, or only some of a family's discounted requests): the discount is worked out again on the classes paid for, the rest becomes a new pending request, extra money goes in Remarks. You confirm first.
- **No bulk discount** on a student's page switches the discount off for the whole family.

- **Razorpay payments to confirm:** check the suggested family and **Confirm**; wrong family? Pick another. **Not a fee** sets it aside.

# Payroll, expenses and reports

What you pay out, and what is left.

### Payroll

- Classes × the teacher's rate, plus ₹100 for each Converted demo
- Adjustments with a note, Mark paid
- 📄 Salary Slip, or 📄 Print all salary slips

### Expenses

- Rent, electricity, internet and so on
- Not teacher pay: payroll is counted separately

## Reports & Export

| Report | Shows |
|---|---|
| **Student report, balances** | Classes and balances per student |
| **Net profit** | Fee collection minus payroll and expenses |
| **Classes per teacher, register** | Each teacher's classes for the month |
| **Razorpay payments** | Every Razorpay payment for the month, fee or demo |
| **Refunds, Excel export** | Refunds issued; download the data |

# Students & Subscriptions

Everything about one student on one page.

| Section | What you do there |
|---|---|
| **Details** | Contact details, grade, category, board, parents' numbers |
| **Subject enrollment** | Add or remove subjects; needed before payments and classes |
| **Subscription balances** | Subscribed, used and left per subject and type |
| **Fee requests** | Raise one (Calculate fills it), Message, Mark paid |
| **Record payment** | Classes bought; the amount fills in from the rates |
| **Refund, Transfer** | Refund unused classes, or move them to another subject |
| **Subscription history** | Active, upcoming and expired payments, with receipts |
| **Special fee rates** | An agreed per-class rate for this student, with dates |
| **Notes, attendance** | Private teacher notes and the full attendance record |
| **Call log** | Record calls with the student or parent, add a call note and set a Call again date; demo-stage calls are also shown |
| **Attendance XP & Levels** | Review the student attendance rewards and levels in the dedicated People page |
| **Student Onboarding & Communication** | Open the dedicated People page for student / family onboarding and communication tasks |

**SPECIAL FEE RATES**

- Set subject, Group / Individual, rate (and an Offline rate if different), from and until.
- Used everywhere this student's fee is worked out. Discount tiers still apply.
- Saved requests and payments don't change.

# Teachers, subjects and Class Frequency

Who teaches what, and how often each student comes.

- **Teachers & Subjects:** add teachers and subjects and set which teacher teaches each subject.
- Transfer a student or all of a departing teacher's students to another teacher.

## Class Frequency

1. **Open it**
   The **Class Frequency** button at the top of Teachers & Subjects.

2. **+ New Frequency or Edit**
   Pick the student and subject, tick the weekdays and set the classes on each day (60 minutes each).

3. **Fill the gaps**
   Pairs that are **Not configured** are listed; teachers can set their own students too.

**USED BY**

- Raise fee requests, to count the month's classes.
- Rebuild Pending Classes, to make the schedule.
- Saving it never changes classes already scheduled.

# Parents

One parent login per family.

1. **Create all parent logins**
   Preview lists every family without a login. Nothing is saved until you press Create.

2. **Login details**
   Login ID and first password are the parent's 10-digit mobile. Brothers and sisters share one login.

3. **Send them**
   📤 **WhatsApp** sends each family its login. You can resend from the parent's page.

- **Manage parent logins:** search by mobile, parent or child, then link or unlink children.
- Parents are asked to change the password after their first login.

# Study Plans, Homework and Question Bank

Follow what teachers set.

### Study Plans

- Read-only view of every plan and progress
- Textbook library: rename, retag or delete books

### Homework

- Every homework set by every teacher
- Filter by teacher, student or status

### Question Bank

- Review Queue, Full Question Bank, Archived
- Practice Papers and Past Papers

**TEACHER ACCESS**

Teachers see the Question Bank and Research tabs only when you switch them on in Settings.

# Teacher Monitoring tools

Review teacher activity and output. These are monitoring views; use the normal source screens to correct records.

### Star Teacher

- Switch the monthly points programme on or off and set its start date.
- Review the leaderboard and each teacher's points, level, badges and activity breakdown.

### Research Monitoring

- Review teacher-wise saved lesson briefs and resources added or shared.
- Filter by month and teacher. Brief text and private notes are not displayed in this monitoring view.

### App Usage

- Review screens opened and tracked actions by teacher, by feature or by user.
- The report also includes teachers with no recorded activity in the last 30 days; no event does not necessarily prove no work was done.

### AI Usage

- Review AI calls, tokens and estimated costs by user and feature.
- AI master switch, role/person access and API settings remain under System → AI.

### Study Plans and Textbook library

- Read-only view of teachers' study plans and student progress.
- The Textbook library lists uploaded books and supports rename, retag and delete.

### Homework

- Review homework set by teachers and filter by teacher, student or status. Use the teacher/student workflow to resolve or correct individual records.

### Question Bank Monitoring

- Read-only teacher-wise activity: access status, visits, questions added and approved, practice papers created, student assignments, submissions and reviews.
- Counts use recorded app events and database timestamps; incomplete event tracking can make activity counts incomplete.

### Question Bank work screen

- The operational Question Bank remains under Daily work, separate from monitoring.
- Use Review Queue, Full Question Bank, Archived, Practice Papers and Past Papers for question review and paper operations.

**MONITORING IS NOT AN EDIT SCREEN**

Use the original app workflow to change a study plan, homework item, Question Bank record or teacher setting. Monitoring views should not be treated as a substitute for the source record.

# Analytics and Teacher Appraisal

Admin reporting pages for admissions, class delivery, student engagement, revenue and teacher performance.

### Demo Analysis

- Unified admissions funnel across prospect and student records.
- Review open prospects and lost / cancelled / rejected outcomes.
- Compare acquisition sources, record types and course interest.
- Open stage records and recent admissions activity, including recorded follow-up history.
- Period selector: Last 30 days, Last 90 days or All records.

### Class Delivery Intelligence

- Filter by period (This month, Last 30 days, Last 90 days or All available records) and class type (Group, Individual or Special).
- Review Scheduled, Conducted, Absent, Pending and Overdue counts.
- See teacher delivery rate and student attendance rate, the last-14-days attendance trend, performance by teacher, student attendance and current overdue classes.
- The report reads scheduled_classes and sessions; it does not itself correct attendance or schedules.

### Student Engagement Intelligence

- Filter by month, grade and subject; search students and switch between students needing attention or all active students.
- Review attention flags, three-month attendance trend, currently overdue classes and Student login activity (current month and six-month trend).
- Inspect Study Plans and Homework activity and read-only student detail. Knowledge Arena attempt data is unavailable to this Admin report under current database read policies; no participation count is inferred and non-participation does not create an attention flag.
- Data Quality Checks show exceptions detected by the current checks; a clean result is not proof that every source is complete.
- Knowledge Arena individual attempts are not read by this report.

### Revenue Intelligence

- Filter by delivery month range, teacher, student, subject, class type and Online / Offline mode.
- Review class-level fee value, teacher delivery cost and gross contribution, with contribution by class type and mode and a six-month monthly trend.
- Compare student, teacher and subject profitability.
- Reconcile payroll payments to delivery months; distinguish payments made in the selected period from earlier delivery months still unpaid.
- Review student collections, teacher payroll, recorded expenses and Financial data quality; export class-level CSV.
- Class type and delivery mode come from attendance records; incomplete rate or payment mapping can affect the calculations.

### Teacher Performance Intelligence

- Filter by period (Current month, Last 30 days, Last 90 days, Custom range or All available records), teacher, student, subject and class type.
- Compare teachers by scheduled, conducted, absent, pending and overdue classes, student count, delivery rate and student attendance; select a teacher for detail.
- Review workload distribution, students handled, group / individual classes, subject workload, six-month delivery and attendance trends, monthly delivery rate and workload trend.
- Inspect student engagement by teacher and current overdue classes.
- This is a read-only analytics report; it does not replace the separate appraisal process.

### Teacher Appraisal

Separate, confidential Admin-only appraisal workspace for periods, scoring configuration, evidence review and appraisal records. Teachers do not have access to this workspace. See the dedicated Teacher Appraisal section below.

**DATA COVERAGE MATTERS**

Analytics can only report what the app has actually recorded. A missing or unconfigured source should be treated as unavailable data, not assumed performance. Check the report's data-quality notes before drawing conclusions.

# Settings, admins, AI and audit

How the app is set up.

| Page | What is there |
|---|---|
| **Settings** | Grades, categories, boards, subject names; Question Bank access and Research access per teacher; Star Teacher switch, start date and leaderboard; add users; change your password |
| **Manage Admins** | Add or remove admin accounts |
| **AI** | Master switch, AI access per role and per person, AI usage and estimated cost |
| **Audit Log** | Every change made in the app, login activity and App usage (who uses which feature) |

## Superadmin tools

- Only superuser admins see this menu. Each card opens with the unlock password.
- **Academic Year: Advance everyone** sets the new year and moves every student (except Adult) up a grade. **Set year only** and **Fill blank student years** never change grades.
- **Export all data** and **Import backup**.
- **Danger zone:** remove old Audit and Login entries, clear all data, audit logging on or off.

> **CANNOT BE UNDONE**
>
> Export a backup before any danger-zone action.

# Knowledge Arena content and controls

Manage game content without changing the existing Question Bank, Online Assessment or attendance rewards.

### Grade and subject suitability

Configure which subjects are suitable for each grade, which games are enabled for each grade, and which subjects each game can draw from. These rules are enforced by the API.

### AI question generation

Queue a job by grade, subject, game, difficulty, language, count and optional topic. Questions that pass structural and independent quality validation are published automatically. Rejected or ambiguous candidates are retained for Admin review.

### Question review

Validated AI-generated questions publish automatically after structural and independent quality checks. Use the review controls to inspect published content and correct issues when needed.

### Rejected questions

Open the Rejected review queue to inspect candidates retained with their rejection stage and reason. Correct a recoverable question and approve it to Draft, or dismiss it. Rejected questions are not available to players.

### Manual questions

Use Add Question to create a question yourself. Subject and Grade are dropdowns populated from the existing catalogue; duplicate labels are removed. Complete all four distinct options, select the correct answer and add an explanation. Save creates a Draft only.

### Draft publishing

Questions recovered from the Rejected queue and manually entered questions remain Drafts until an Admin explicitly publishes them. Validated AI-generated questions publish automatically.

### Daily challenge

Daily challenges use grade-eligible Quick Quiz questions from subjects enabled for that grade. A challenge is available only when ten suitable published questions can be assembled.

### AI budget and reservations

Daily and monthly INR limits are shared. Interrupted or uncertain provider calls remain reserved for review; verify actual cost before settling them.

- Knowledge Arena question management and publishing are Admin-only. Teachers and students do not receive access to the Admin review queues or manual-entry controls.
- The existing Question Bank and Online Assessment remain separate systems. Do not copy Knowledge Arena questions into their tables or workflows.
- A game appears to a player only when at least five published questions match its game, grade and enabled subjects.
- The subject selector in player mode is not exposed to Students; subject remains internal metadata for suitability and question selection.
- Knowledge Arena Game XP is separate from attendance XP, levels, badges, streaks and the existing attendance leaderboard.

- The Admin screen is aggregate-only for player performance; it does not expose individual answers or question-level student history.
- A no-published-questions message means eligible published content is unavailable for that game and grade. Check publication status, grade labels, subject and game type before changing student settings.

**DIFFERENT PUBLICATION PATHS**

Validated AI-generated questions publish automatically. Manually entered questions and questions approved from the Rejected queue remain Drafts until an Admin explicitly publishes them. Keep Knowledge Arena separate from the existing Question Bank / Online Assessment.

# Teacher Appraisal: complete Admin workflow

A confidential, Admin-only process for reviewing teacher performance. Teachers, Students and Parents cannot open this module or view appraisal records.

### 1. Appraisal overview

- Choose an existing appraisal period to see teacher scores, ratings and status.
- The overview shows teacher count, average score, finalised count and appraisals awaiting review.
- Use Consolidated PDF to print the selected period's teacher summary.

### 2. Create a period

- Choose Monthly, Quarterly, Half-yearly, Yearly or Custom.
- Enter the start and end dates and a clear period label.
- Generate appraisals creates one Draft appraisal per active teacher; it does not overwrite existing appraisals.
- The period uses the scoring configuration effective on its start date. If no eligible published configuration exists, generation is blocked.

### 3. Review an individual appraisal

- Open a teacher's row to see the provisional score out of 100, rating, period and configuration version.
- Review category, subcategory and criterion scores, weights, explanations and calculated values.
- Expand underlying records to inspect the evidence used by a criterion.
- Use What does this criterion mean? to inspect its purpose, scoring method, maximum points, evidence source and configured parameters.

### 4. Complete Admin assessments

- Some criteria require an Admin score from 0% to 100% and a supporting observation.
- Enter both the score and evidence / observation, then Save assessment.
- Add category observations and an overall observation and recommendation.
- A score with outstanding Admin assessments is provisional. Do not treat missing or unconfigured evidence as poor performance unless the criterion says it was expected and applicable.

### 5. Recalculate and finalise

- Recalculate evidence refreshes the evidence and scores for a Draft or reopened appraisal.
- Check data coverage, applicability, evidence rows and every Admin-assessed criterion before finalising.
- Finalise appraisal is blocked while required assessments or observations are incomplete.
- Finalised appraisals are locked from ordinary editing and preserve their configuration and evidence snapshot.

### 6. Reopen a finalised appraisal

- Use Reopen only when a correction is justified.
- Enter a reason; the reason is required and recorded.
- Review the reopened record, make the correction, recalculate if needed and finalise again.

### 7. Scoring configuration

- Open Configuration preview, then Scoring Setup to work on the scoring rules.
- The hierarchy is Category → Subcategory → Criterion. Category weights must total 100; subcategory weights must equal the parent category; criterion weights must equal the parent subcategory.
- Configure targets, scoring methods, deadlines, grace periods, bands, deductions, evidence sources and applicability where supported.
- Use Test with a teacher to select a teacher and date range. The NOT SAVED preview shows the provisional total and category-level points only; it does not show the criterion-by-criterion calculation or underlying evidence. Open an individual generated appraisal to inspect subcategories, criteria, calculated values, explanations and evidence records.

### 8. Version and period controls

- Save draft stores a new Draft configuration version. Publish new version makes it active from its effective date and archives the previous published version.
- Existing periods and finalised appraisal snapshots retain their original configuration; publishing a new version does not rewrite historical scores.
- Period dates can be edited only before appraisal snapshots are generated.
- Only unused Draft or Archived configuration versions can be deleted. Published or period-linked versions are protected. Draft appraisals and a period containing only Draft appraisals have separate delete controls; deletion is permanent.

### 9. Audit trail and PDFs

- Open Audit history inside an appraisal to see who changed what and when, including recorded change details.
- Individual PDF prints the selected appraisal. Consolidated PDF prints the selected period's teacher summary.
- Keep appraisal observations factual, evidence-based and professional. Treat appraisal information as confidential Admin material.

### 10. Interpreting scores responsibly

- A provisional score is not a final rating.
- Not-applicable criteria are excluded from the applicable-weight calculation; remaining criteria may be proportionally normalised.
- Automatic metrics depend on source records and tracking coverage. A report with no evidence may mean no activity, unavailable tracking or incomplete source data; inspect the criterion note and evidence before drawing a conclusion.
- Admin-review criteria require a human assessment; do not substitute an assumed score.

**ACCESS BOUNDARY**

This module is restricted to active Admin accounts. Do not share appraisal PDFs or screenshots with teachers or other roles through public links or shared devices.

# Quick reference

I want to… where do I go?

| I want to… | Go to |
|---|---|
| **Log a class** | Class Log |
| **Register a new student** | New registrations (send the form link) |
| **Book or follow up a demo** | Demo Bookings |
| **Raise this month's fees** | Fees › Raise fee requests |
| **Send a fee message or reminder** | Fees › Pending fee requests › Message |
| **Confirm a Razorpay payment** | Fees › Razorpay payments to confirm |
| **Record a payment** | Students › student › Record payment |
| **Give a student a special rate** | Students › student › Special fee rates |
| **Set weekly classes** | Teachers & Subjects › Class Frequency |
| **Rebuild the schedule** | Rebuild Pending Classes |
| **Make parent logins** | Parents › Create all parent logins |
| **Pay teachers** | Payroll |
| **See profit** | Reports › Net profit |
| **Turn on QB or Research** | Settings |
| **Turn AI on or off** | AI |
