Getting started and help

Four steps to your first login, and where to get help.

1. **Open the link**
   Use the link shared by LIB: **app.libeducation.com**.
2. **Sign in**
   Enter the username and password LIB gave you.
3. **Set a new password**
   Change it after your first login so only you know it.
4. **Add it to your home screen**
   Android: tap Install. **iPhone:** tap Share, then Add to Home Screen.

FORGOT YOUR PASSWORD?

Call or WhatsApp LIB on +91 98453 93178 and we will reset it.

Getting help

Inside the app

- **Help** button: answers how-to questions
- **Support** button: report an issue
- **Chat**: message the admin or your colleagues

Contact LIB

- WhatsApp / phone: +91 98453 93178
- Email: kakali@kakali.in
- Website: www.libeducation.com

You only see your own information. Issues you raise show a status (Open, In Progress or Resolved) and LIB can reply with a note.

What's new in this edition

The biggest additions since the last guide.

Pending Action Items

One list of everything waiting for you, with a count on the menu and a gold strip on your Dashboard.

Class Frequency

Set how many classes each student has on each weekday. The office uses it for fees and the schedule.

Mark demos done

After a demo, press ✓ **Mark done** and add a line on how it went.

Class timings to correct

Classes at 00:00, 01:00 or 02:00 are placeholders: put in the real time.

WHERE TO FIND IT

Pending Action Items is at the top of the menu, under Dashboard, with Star Teacher below it when it is on. Class Frequency is in the Teaching group. Tap **?** next to a heading in the app for quick help on that screen.

Your portal

Up to fourteen tabs (* only when the admin switches it on for you). Everything is limited to your own classes and students.

Tab	What you do there
Dashboard	Today's classes, earnings, alerts and AI tools
Pending Action Items	Everything waiting for you, one tap to each
Class Schedule	Create, run and export your timetable
Class Frequency	Classes per weekday for each student and subject
My Students	Contacts, subjects and class balances of your students
Study Plans	Topic roadmap for each student and subject
Homework	Assign, track and review homework
Question Bank*	Review questions, build practice papers, mark attempts
Research*	Lesson prep, student insights, question research, resources
Availability	Weekly windows, leave and the free-slots report
My Attendance Report	Your history and your students' balances
Give Attendance	Record the classes you have held
My Profile	Contact details, bank and UPI, online class link, photo
Setup	Change your password

Dashboard

Everything you need at the start of the day.

Given
Classes given today

Earned
Earned this month so far

Renew
Students needing renewal

Card	What it shows
Today's classes	Time, student, subject, type and status
My earnings	Hidden until you enter your password
Month in review	Last month's classes and earnings
Student milestones	Alerts at 25, 50, 100 and 200 classes
Low balance alert	Students down to their last few classes
Not seen in a while	No class for 10 days or more
My demo classes	Mark demos done; status and bonus earned
Expiring soon	Classes about to lapse
Study plans	"X without a plan": tap it to go straight to Study Plans

Pending Action Items

Everything waiting for you, in one place.

- The number on the menu and the gold strip on your Dashboard count every item. Tap an item to go straight to it.
- Attendance can be given only for the current month, so mark every class before the month ends.

Counted item	What to do
Today's classes not done	Today's classes whose time has passed
Class timings to correct	Classes at 00:00, 01:00 or 02:00
Schedule setup	No Class Frequency or no upcoming classes
Demos to mark done	Demos you have given
Homework and papers	Work your students have submitted
No study plan	Students without a plan yet
Unread messages	Chats, notifications and announcements
Availability not set	Add your weekly hours

KEEP AN EYE ON

Reminders, not counted: lesson prep, expiring classes, renewals, low balances, students not seen, late homework or papers, your open support tickets.

Star Teacher

A monthly points game, just for fun, when the office switches it on.

- Find it below Pending Action Items. Only you see your own points.
- Points for classes marked the same day, remarks, homework given and reviewed within 48 hours, practice papers, study plans, lesson prep, shared resources, demos, renewals and using the app.
- The **+number** next to it in the menu is what you can earn right now: open **Earn now** to see how.

Bronze	100 points in the month
Silver	250 points
Gold	450 points
Platinum	700 points

TROPHY SHELF

Badges you earn stay on your trophy shelf, even after the month ends.

Class Frequency

How many classes each student has on each weekday.

1. **Open Class Frequency**
   In the Teaching group. You see only your own students and subjects. Search by name or subject.

2. **Tap Set or Edit**
   Next to the student and subject.

3. **Tick the weekdays**
   And set how many classes on each day (each class is 60 minutes). Then Save.

WHY IT MATTERS

- The office works out each month's fee from it.
- The class schedule is rebuilt from it, so keep it up to date when a timetable changes.
- Saving it does not change classes already scheduled.

Placeholder class times

- When the office rebuilds the schedule, new classes get a placeholder time: **00:00** for Group, **01:00** or **02:00** for Individual.
- They show under **Class timings to correct** in Pending Action Items. Open the class and set the real time.

Class schedule

Plan your classes and mark them done.

Create

- **Weekly pattern:** pick days and times; it repeats until the subscribed count is filled.
- Every class is 60 minutes.
- **Extra class:** add a one-off class, for example a makeup.
- A schedule never goes beyond the classes the student has subscribed to.

Run

- Switch between **Today** and **By month**; filter by student and subject.
- **Mark done:** Present or Absent, count, mode and remarks.
- Edit the date and time, or undo. Export to Excel.

RULES

- Individual students never share a slot.
- You cannot schedule on your own leave days.
- Students and parents see the schedule read-only.

Give attendance and your report

Keep the register accurate.

Give Attendance

1. **Choose the class**
   Pick the student, subject, type and mode.

2. **Mark it**
   Present or Absent, with remarks if needed.

3. **Check the balance**
   The form shows how many classes that student has left.

WATCH OUT

- The app warns you if the student has no classes left or the entry is a duplicate.
- You can record the current month only, never a future date. A gold box says so; from the 25th it turns red and counts down the days until the month locks. For an earlier month, call the admin (tap the number).

My Attendance Report

- Classes taught, by date, student and subject.
- Total present, absent and students taught.
- Subscription balances for every student mapped to you.

Availability, leave and free slots

Tell the centre when you can teach and when you cannot.

Availability

- Weekly windows for each day
- Advisory only: classes can still be booked outside when needed

Leave

- From and to dates, with a reason
- Blocks new scheduling in that window
- Classes already booked stay as they are

Free slots report

- Free time inside your availability, after booked classes
- For one day, or the month from today

My Students

Everything about the students enrolled with you, in one list.

- One card per active student in your subjects: student and parent contact details, and their subjects.
- For each subject: classes subscribed, used and left, and the next expiry date.
- Search by student name, parent, phone or email.
- Fees and payments are not shown. Ask the admin about those.

Study Plans

A topic roadmap for each student and subject.

1. **Open the plan**
   In the Study Plans tab (it opens in Report view), tap a student's row, then pick the subject.

2. **Switch to edit**
   Tap **Edit**. Tap **+ Add topic** to add topics one at a time, with optional notes.

3. **Or fill it for you**
   Tap ✨ **Suggest topics** or 📚 **Add topics from textbook**.

4. **Order and tidy**
   Drag the ☰ handle to reorder; tap ✕ to delete a topic.

5. **Save**
   Students and parents can see the plan straight away.

Topic status

Not started	The default when a topic is created
In progress	Currently being covered
Done	Topic completed

GOOD TO KNOW

- One plan per student per subject.
- Unlinking a textbook keeps it in the library.
- Students and parents see the plan read-only.

Homework: assigning

Tap **+ Add Homework** in the Homework tab.

1. **Choose student and subject**
   Pick any student mapped to you.
2. **Describe the work**
   Enter a title (required) and a description. The box is large, so give detailed instructions.
3. **Set the due date and Total Marks**
   For example 20: the student's score will be out of this.
4. **Attach a file (optional)**
   Tap **Choose File** to add a PDF, image or document for the student.
5. **Link a Study Plan topic (optional)**
   Then tap Save.

> **EDITING**
> Tap **Edit** on any homework card to change it, whatever its status. The form reopens filled in.

Homework: tracking and review

Filter the list to focus on what needs action.

Assigned	Waiting for the student to submit (the default view)
Submitted	The student has submitted: ready for your review
Reviewed	You have given marks and feedback
LATE	Past the due date; still shows under Assigned

Button	What it does
✓ **Mark complete**	For work done in class: moves Assigned to Submitted
Mark reviewed	Enter marks and written feedback, then Save Review
Reopen	Moves it back to Assigned if the student needs to redo it
Remind	Opens WhatsApp with a reminder for assigned or late work
WA (on Reviewed)	Sends the score and feedback by WhatsApp
Delete	Removes the homework permanently

PHOTOS AND FILES ARE PRIVATE

Submitted photos and attached files open through secure links that only work for signed-in users. If a photo stops loading after you have had the app open for a few hours, tap Refresh.

The Question Bank

Questions taken from past board papers, checked by you before anyone uses them.

Review Queue

New questions waiting for a teacher to check and approve.

Full Question Bank

Every approved question you can use in papers.

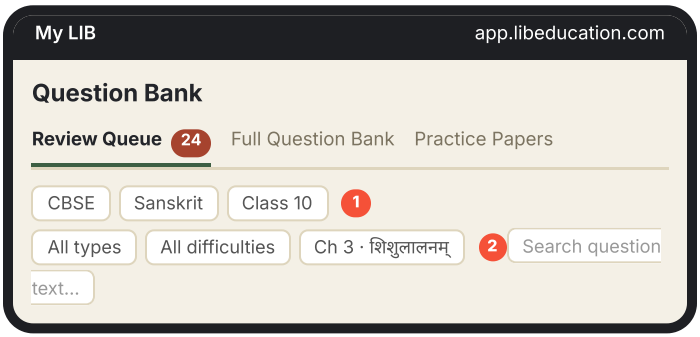

Practice Papers

Build papers, assign them and mark attempts.

Finding questions

1. **Choose Board, Subject and Grade**
   These three unlock everything else. You only see the subjects and classes you teach.

2. **Narrow it down**
   Filter by type (MCQ, Short, Long, Grammar, Unseen Passage and more), difficulty and **chapter**, or search the question text. **✕ Clear** starts again.

① Board, subject and class unlock the filters. ② Then narrow by type, difficulty, chapter or text.

Reviewing questions

You know your subject best: check each question before approving it.

① Duplicate flag. ② Approve it. ③ Edit it first if something is wrong.

1 **Open the details**

Tap the question text or **Show details** to see the passage, answer and explanation.

2 **Fix anything wrong**

Tap **Edit**: change the text, type, marks (half marks such as 1.5 are fine), difficulty, chapter or answer key. Tap Save.

3 **Approve**

Tap ✓ **Approve**. The question moves to the Full Question Bank and can be used in papers.

OLD SYLLABUS

These questions are hidden; tick **Old syllabus only** to see them. Auto-fill never uses them, but **Swap** can add one.

Chapters and duplicates

Keep the bank tidy so papers are balanced across chapters.

Chapters

- Every question should belong to a textbook chapter. **No chapter** in red means it isn't linked yet.
- Choose **No chapter yet** in the chapter filter to find them.

1. **Tick the questions**
   Use the box at the top left of each question card.
2. **Choose the chapter**
   In the bar that appears above the list.
3. **Tap Set chapter**
   All ticked questions move to that chapter. **Remove chapter** clears it.

Duplicates

⚠ Duplicate	The same question appears more than once
⚠ Already in bank	An approved copy already exists, so you can leave this one

> **TIP**
> Tick **Duplicates only** next to the filters to see just the repeated questions.

Building a practice paper

A full board-style paper, filled from the approved bank in one tap.

1. **Start a paper**
   In **Practice Papers**, tap **+ New paper** and pick a blueprint, for example CBSE Class 10 Sanskrit, 80 marks. Title and minutes are optional.

2. **Tick sections and lessons**
   Untick sections you don't want; the total updates. Tick lessons for a lesson-only paper (none = all): this unticks Grammar, Writing, Unseen Passage and Translation, which use all chapters if you tick them back.

3. **Create and auto-fill**
   The app fills every section, balanced across chapters. If the bank runs short, the gap shows in red, for example "Section C: 12 of 15 marks".

4. **Mark ready**
   When you're happy, tap **Mark ready**: the paper changes from **Draft** to **Ready**. Until it's assigned you can still go **Back to draft** or **Delete paper**.

Adjust the questions

Button	What it does
Swap	Replace it with another approved question of the same type
↑ ↓	Move it up or down
Remove, + Add	Take one out, or add one to a section
Re-run auto-fill	Fill the whole paper again, using the same sections and lessons

Assigning and downloading papers

Send a ready paper to your students, or print it.

1. **Open the paper**
   Tap it in the Practice Papers list.

2. **Assign to students**
   Tap **Assign to students**. Students in the paper's board, class and subject are listed first; tick **Show my other students** to see the rest, with a ⚠ note saying why they don't match.

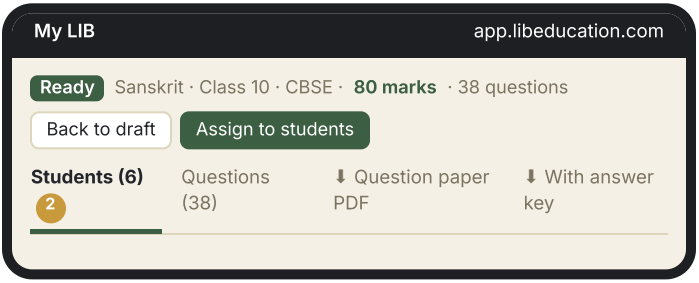

3. **Set a due date**
   Then tap **Assign**. Students see it on their home screen straight away.

ONCE ASSIGNED

- The questions are fixed so every student gets the same paper.
- You can remove a student until they start the paper.

Download as PDF

- ⬇ **Question paper PDF**: the paper as students would sit it.
- ⬇ **With answer key**: the same paper with the answers.
- Both open a print view: choose **Save as PDF**, or print directly.

A ready paper: assign it, then download it with or without answers.

Marking practice papers

MCQs are marked automatically. You mark the written answers.

A gold number on the **Practice Papers** tab shows how many papers are waiting. Open a paper, then its **Students** tab, and pick **Needs marking**.

1. **Tap Review**
   Next to a student who has submitted. Oldest submissions come first.

2. **Check MCQs**
   Already marked: you see the option picked and the correct one. Change the **Marks** or add a comment if needed.

3. **Mark written answers**
   Read the typed answer or tap a photo to open it full size; **Model answer** is there if you need it. Enter **Marks** and an optional comment.

4. **Add overall feedback**
   What went well and what to revise.

5. **Finish**
   Mark as reviewed, or **Mark as reviewed & next** to go to the next student. **Save marks for later** keeps your work without finishing.

GOOD TO KNOW

- Answers you leave unmarked count as 0; the app asks before you finish.
- The student and parent see the score and feedback as soon as you mark it reviewed.
- Reopen a reviewed paper with **View / edit marks** to change it.

Research: lesson prep

An AI brief for the chapter you teach next.

1. **Pick the subject**
   Then the grade (only if the subject has more than one), a student if you like, and the board.

2. **Choose the chapter**
   Pick from the list (Question Bank chapters, then Study Plan topics) or type any topic. Add anything else to focus on.

3. **Read the brief**
   Key points, a teaching order, common mistakes, examples and practice questions, plus matching questions from your Question Bank.

4. **Save it**
   Tap **Save** to keep it under **Saved briefs**, with the student's name. Filter saved briefs by student.

CHECK BEFORE CLASS

AI can get things wrong. Check the brief against the textbook before you use it.

SWITCHED ON BY THE ADMIN

The Research tab appears only when the admin has turned it on for you and AI is on.

Research: insights, question research, resources

Know where students struggle and what the board asks.

Student insights

- Marks by chapter and question type, from practice papers you marked
- Under 60% shows as weak
- Filter by subject, grade, period or student
- **Make a paper on weak chapters** starts a practice paper with those lessons ticked

Question research

- Per chapter: which past papers asked it
- Average marks per paper and question types
- The past questions themselves

Resource library

- Keep notes, worksheets, pictures and links by subject and chapter
- Tick **Share with students** to show an item to your students and their parents under "From your teachers"

GOOD TO KNOW

Student insights and Question research use the Question Bank, so they need Question Bank access too.

Earnings, salary slip and demos

See what you have earned, and when you were paid.

My earnings

- Hidden behind your password, and hidden again automatically
- Base pay: classes taught × your rate
- Plus demo bonus, plus or minus any adjustment with its note

Payment status

- Net payable for the month
- Paid (with date and reference) or Pending
- Printable salary slip

YOUR BANK DETAILS

Enter your bank account, IFSC and UPI ID once in My Profile. After that only the admin can change them.

Demos and bonus: ₹100 for every demo student who joins

Pending	Demo booked: press ✓ Mark done after you give it
Done	Demo given; the office follows up with the family
Converted	Student enrolled: ₹100 bonus earned
Lost	The student did not join: no bonus

- Your own demos are on your Dashboard: date, time, subject, board, status and bonus. Demo students' contact details are not shown.
- The bonus is added to your payroll for the month the student joins.

Your students and AI tools

Notes, milestones, gentle nudges and help from AI.

Student notes

- Write a short note for a student
- They see it on their home screen
- AI can draft a progress note

Milestones

- Celebrates 25, 50, 100 and 200 classes with a student
- Dismiss each card once seen

Alerts

- Students needing renewal
- Low balance
- Not seen for 10 days or more

AI tools (when the admin turns AI on for you)

Tool	What it does
Monthly summary	A summary of your classes for the month
Progress note	A draft note about one student
Messages to parents	Absent follow-up or a parent update, drafted for you
Ask AI	Questions about your own classes only; it never sees other teachers' data

Profile, chat and ID card

Everything personal in one place.

My Profile

- Mobile number, bank and UPI details
- Online class link shown to your students
- Photo from gallery or camera (up to 5 MB)

Chat and help

- Chat with the admin and colleagues
- Notifications and announcements
- Help and Support buttons

Your Teacher ID card

1. **Upload your photo**
   In My Profile. The card can’t be made without it.

2. **Tap ID Card**
   It shows the LIB logo, your photo and name, your Teacher ID code and the current academic year.

3. **Print or Save as PDF**
   Keep a copy on your phone.
